

BOOST YOUR **Makita** PERFORMANCE WITH JEMMS ACCESSORIES

JEMMS
SINCE 1988

ENGINEERED FASTENING SOLUTIONS

Multi-Spindle:

Pre-start fasteners within any bolt pattern, saving time by eliminating individual run-downs.

Jemms-Cascade Attachments enable you to use cordless technology on applications previously thought to be impossible. We provide solid solutions to the automotive, aerospace, agriculture and general industries world-wide.

Aerospace:

Modular assemblies provide unlimited options to suit your applications

Closed End Attachment:

Low profile, sleek design with robust smooth operating gear technology

Multipliers / Angle Heads:

Increase your tool output by 5x its current capability

Tube-nut Attachment:

Precision designs provide consistent torque & unrivaled durability
