

Precision Where It Matters

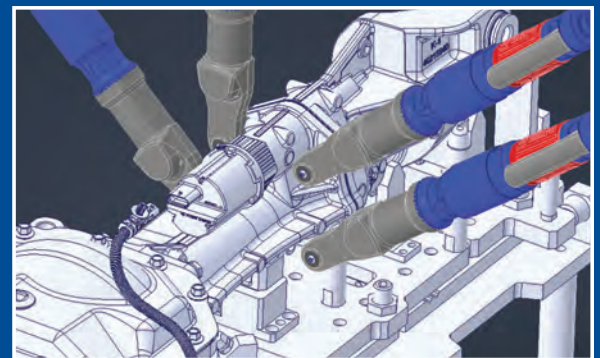

Jemms Automotive Assembly Solutions

ENGINEERED FASTENING SOLUTIONS

Expertise in Engine Driveline, Axle, Suspension & Transmission Assembly

Every vehicle platform brings unique packaging, access and performance demands. At JEMMS, we specialize in turning “impossible” assembly scenarios into reliable, repeatable production processes — so you hit torque targets, cycle time goals and cost thresholds every shift, every day.

WHAT WE DO:

- 3D Space-Constraint & Access Analysis
- Assembly Tool Consolidation Feasibility
- Hold-&-Drive Joint Solutions
- Brake-Line, Junction & ABS Fastening
- Multiple Spindle, Starters & Removal Heads
- Control-Arm & Suspension Linkage Assembly
- Reduce tooling footprint by merging multiple fastening operations
- Select modular, quick-change end-of-arm tooling for mixed-model flexibility
